

Project Profile

Sefton 6th Form College | Sefton, Merseyside

Client	Sefton MBC
Client Sector	Education
Project Value	£10m
Services Provided	Site Option Appraisal
Project Size	
Architect	
Contractors	

Sefton MBC and the Learning Skills Council (LSC) reviewed post 16 education provision in the Borough and found low achievement in the south of the Borough. Their solution was to develop a new college for post 16 education in the south of the Borough. To undertake this, a detailed site option appraisal was required, and we were appointed in April 2005 to undertake the selection process and recommend a suitable site which satisfied the requirements of the partners.

Based on selection criteria we were able to shortlist suitable site, and undertake a more rigorous test of suitability by looking at links to strategy, and environmental, transportation, accessibility, planning, and cost to identify the most suitable site. Sefton and the LSC were able to move the project through its planning and implementation stages.

The added value brought to the client related to our established professional working relationships with the core team, detailed knowledge of the area in question, and the ability to deliver the report on time and within cost.
