

## Project Profile

### Orange Personal Communications Systems

<b>Client</b>	Orange Personal Communications Systems
<b>Client Sector</b>	Telecoms
<b>Project Value</b>	£35m
<b>Services Provided</b>	Cost Management   Project Management   Contract Administration   Planning Supervision   Cell Site Delivery   National Support Capability
<b>Project Size</b>	
<b>Architect</b>	
<b>Contractors</b>	

**Rider Levett Bucknall has supported OPCS in the deployment of their UK base station network from initiation, covering approximately the Southern half of the country.**

Rider Levett Bucknall has successfully Project-Managed thousands of cell sites during a relationship extending over 8 years. In this time Rider Levett Bucknall has developed full life-cycle roll-out experience of Greenfield, rooftop, upgrades, site-shares, co-locations and Microcell sites.

To fulfil the above role, Rider Levett Bucknall has managed all project parties associated with network roll-outs including direct liaison with Site Providers, within a dynamic and often aggressive roll-out environment, with success.

Rider Levett Bucknall has also undertaken internal IT investment, employing database solutions to manage cell site deployment, allowing the successful delivery of increased volumes of cell sites without impact.
