<b>Client</b>	Manchester Airport plc
<b>Client Sector</b>	Transport
<b>Project Value</b>	£45m
<b>Services Provided</b>	Quantity Surveying   Risk Management
<b>Project Size</b>	
<b>Architect</b>	
<b>Contractors</b>	

**The Ground Transport Interchange is an exciting and complex project which will bring together rail, bus, coach and Metrolink facilities in one location increasing passenger capacity and providing immediate passenger 'check-in.'**

Its philosophy is driven by Manchester Airports target of 25% of all journeys to and from the airport being made by public transport by the year 2005, thus delivering improvements to the environment as a whole and a reduction in traffic on the local road networks. The building will be a high quality 'landmark' and is a clear statement of the aspirations of Manchester Airport plc as they move into the 21st century.

#### Client Benefits

- GMP Contract using a bespoke for of 3-stage Design and Build Procurement process achieving Quality Design and Cost Certainty.
- Understand Client's business and needs
- Support from other Rider Levett Bucknall Streams
