COST CONSIDERATIONS THINGS TO WATCH OUT FOR

ECONOMIC FORECAST Ontario is not anticipated to enter a recession, despite difficulties from the ongoing housing market correction, inflation, and interest rate hikes affecting consumer confidence and spending. Economic activity will slow down, but as the forecast horizon extends past 2022, it will continue to be slightly above or at trend.

INFRASTRUCTURE & SPENDING With planned investments totaling \$159.3 billion over the next 10 years, including \$20.0 billion in 2022–2023, the provincial government's capital plan is one of the most ambitious in the province's history. With the help of this plan, Ontario will become stronger and more prosperous as construction work begins on highways, hospitals, and other vital infrastructure.

JOB CREATION & BUSINESS INTEREST The government is positioning Ontario as a top location for growth and job creation given the rising global competition among jurisdictions to draw business investments. Approximately \$8 billion in cost savings and support for Ontario businesses was provided by the government in 2022, including skilled trades and apprenticeship programs. Investors are receiving a clear message from the government that Ontario is open for business.

CONSTRUCTION COST DRIVERS

SELECT MATERIALS	APPROX. CHANGE FROM Q3 2022
Softwood Lumber	▼ - 6.1%
Cement, Glass, Non-metallic	▲ 8.4%
Rebar	▼ - 9.1%
Lumber & Wood Prod.	▼ - 0.7%
Energy & Petroleum	▼ - 17.4%
Copper	▼ - 3.9%

CONSTRUCTION COST INDEX, ESCALATION, AND TRENDS

ABOUT THE CHART

The above chart provides a comparison between the overall changes in North American key cities' cost index versus Toronto's index, as well as tracked against the construction cycle trend. Finally, the pink area represents the projected results based on research.

WHAT THIS MEANS FOR YOU

Material price increases from inflation and labour shortages continue to impact the construction industry. Also, lockdowns and the COVID-Zero strategy in China and other major countries are still delaying the global supply chain recovery. The pandemic has slowed the training and certification of new workers, impacting short-term labour availability.
